

EXPENSE TRACKER APP

A Project Report on MIT App Inventor
Submitted by: Parthiban

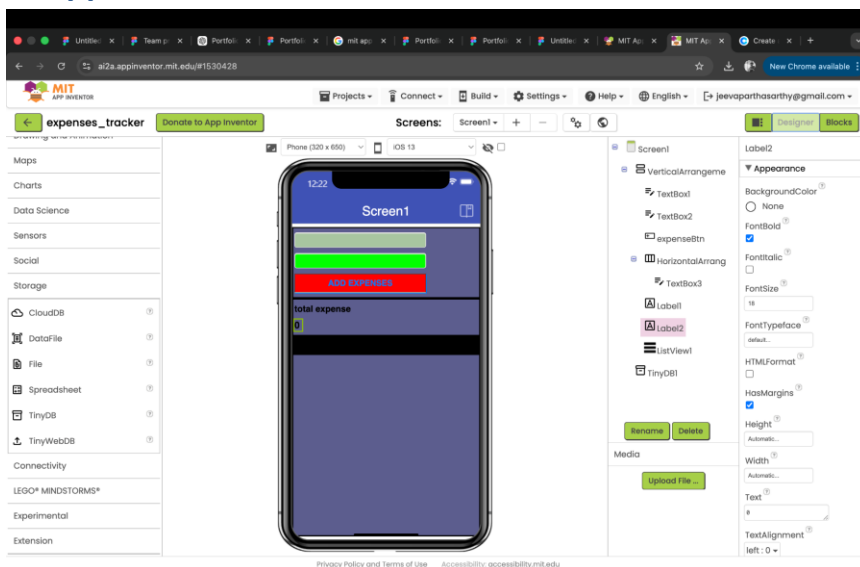

Abstract

This project presents an Expense Tracker app built using MIT App Inventor.

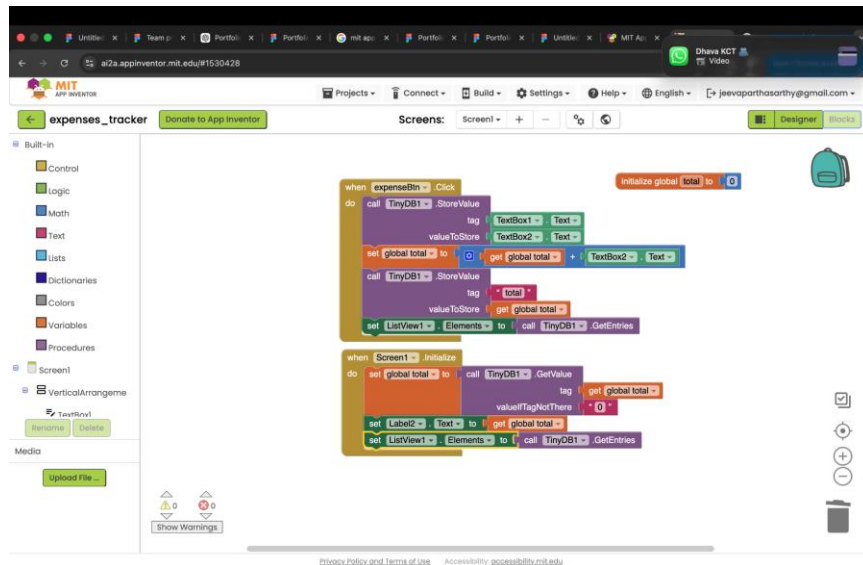

1. Introduction

This app helps users track daily expenses easily.

2. Application Interface

3. Block Programming

4. Detailed Explanation

The app uses TinyDB to store expenses. When user clicks the button, data is stored and total is updated dynamically. ListView displays all stored entries.

5. Conclusion

This project demonstrates basic mobile app development using MIT App Inventor.
